## NURSING BED

Life made  
easier

## Casa Nuova

The Casa Nuova has been designed to accommodate both the needs of the patient and carer whilst bearing in mind the practicalities of being able to assemble, disassemble, and transport the bed from one location to another. Complete with a height adjustable, 4 section - fully profiling mattress support, the Casa Nuova offers the greatest degree of comfort for the patient and a safer working environment for the carer. All functions can be easily attained through a simple to use hand control unit.

# Casa Nuova

The Casa Nuova bed frame can be easily assembled and disassembled by one person and is supplied with a transportation system to allow quick and efficient movement of the bed from one facility to another - assisting with storage management. Additionally, with infection control in mind, the mattress assembly, bed rails, and bed end boards are made from materials that can be easily cleaned when required, to assist with good hygiene practices - extremely important for beds with regularly changing users.

Lower leg section levelling device

Braked castors

Easy to use handset
